

Cat No 3503
10,5cm Leichtgeschutz LG 42/1

Famous German recoilles gun, used on all theatres of the war, designed specially for airborne troops. It was very light and had very good performances. Thanks to the fact it was light, it was possible to transport it in Gotha 242 planes. Design was coming from factories Rheinmetall and Krupp, whole production was done in Bielefeld, factory Durrkopp.

Painting

Guns were painted Panzer Grau overall. Later LG´s got new Euro Gelb overall, sometimes with green or green/brown mottles

This kit is product of PROFIKIT Models ©2004.
